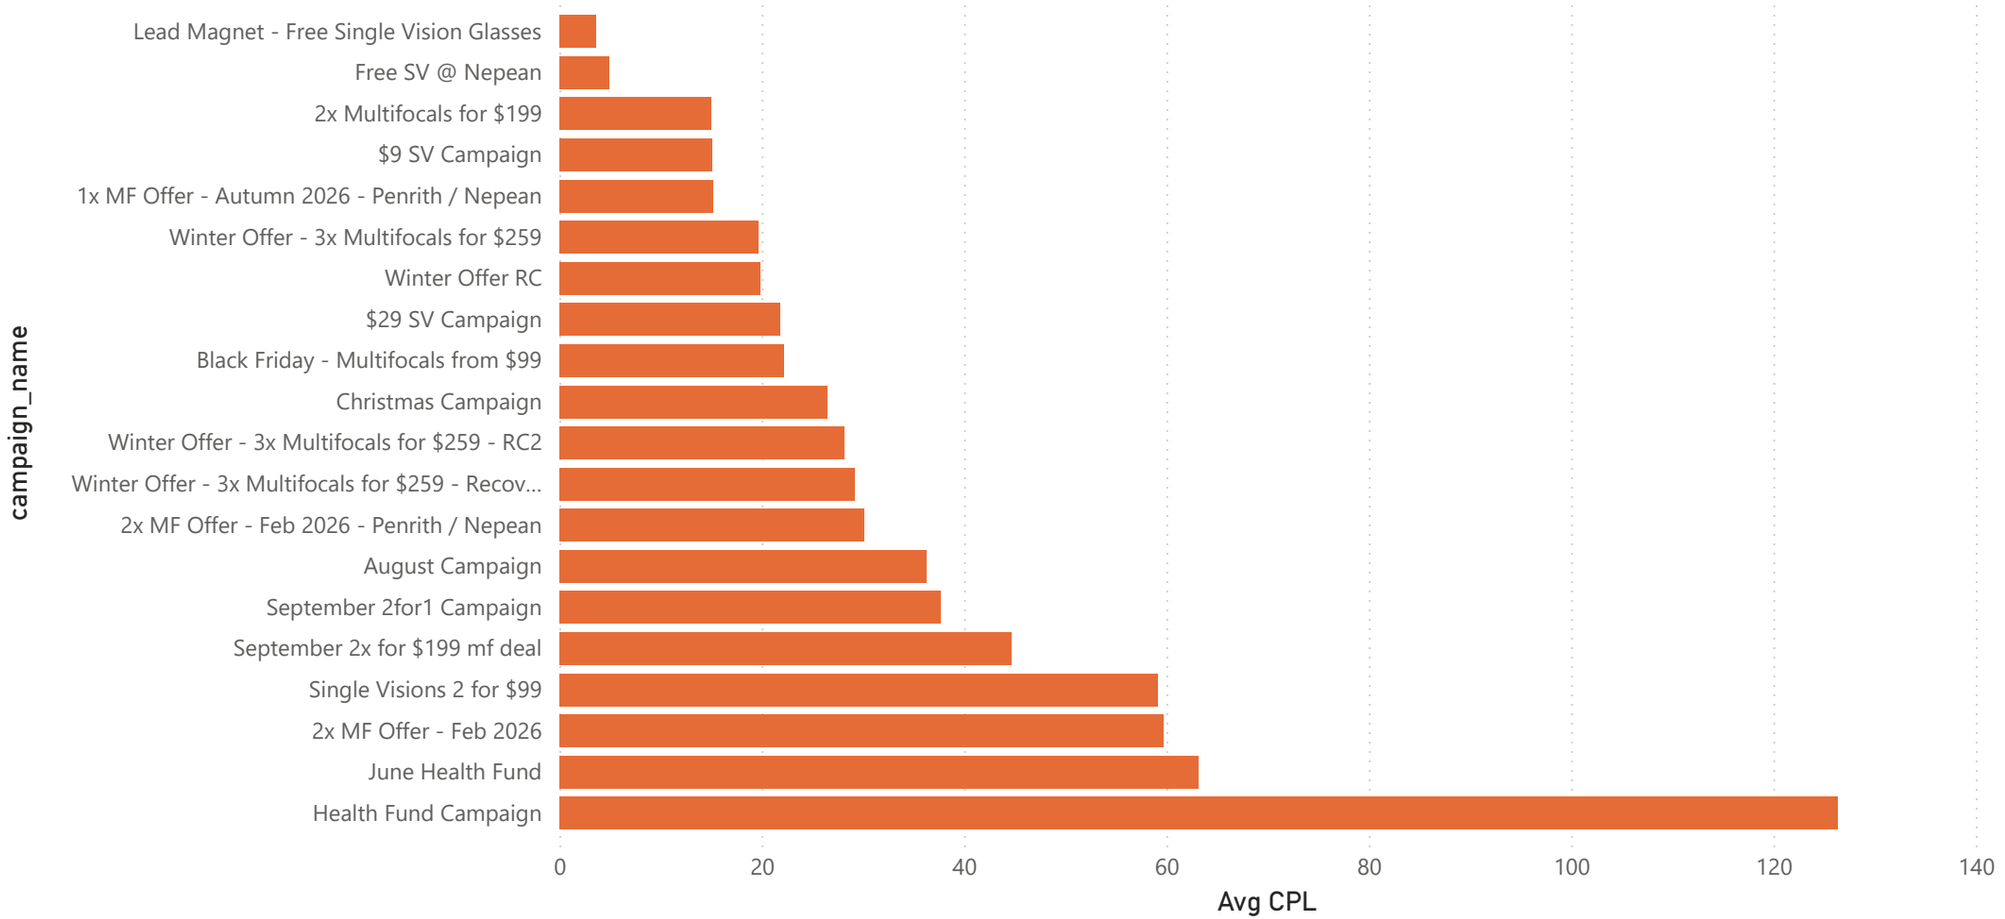
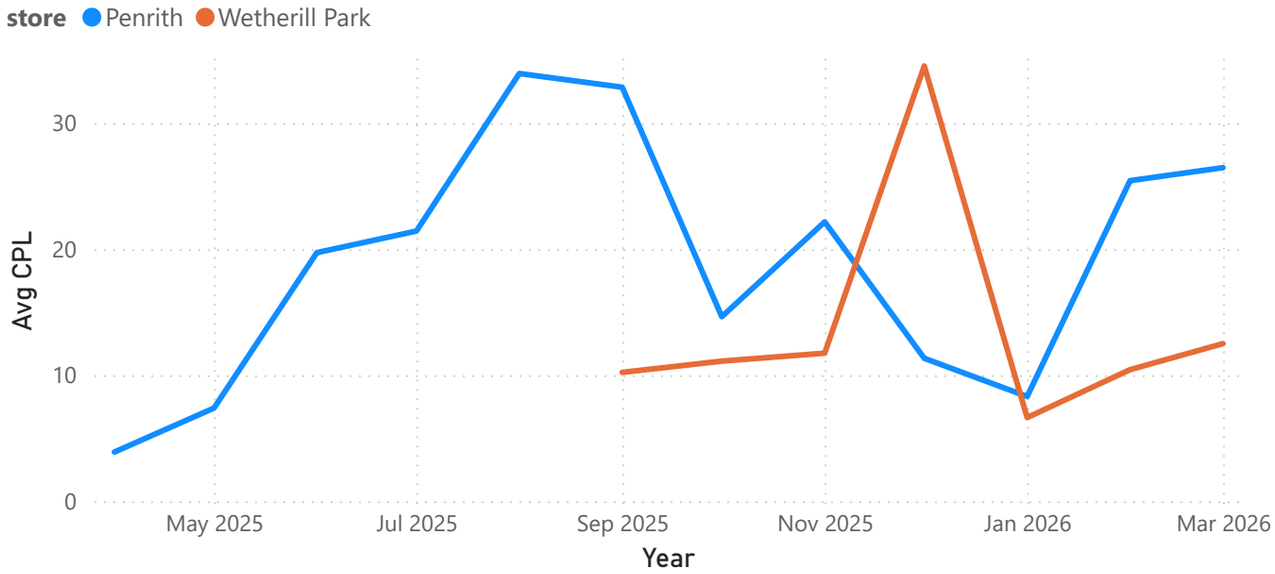
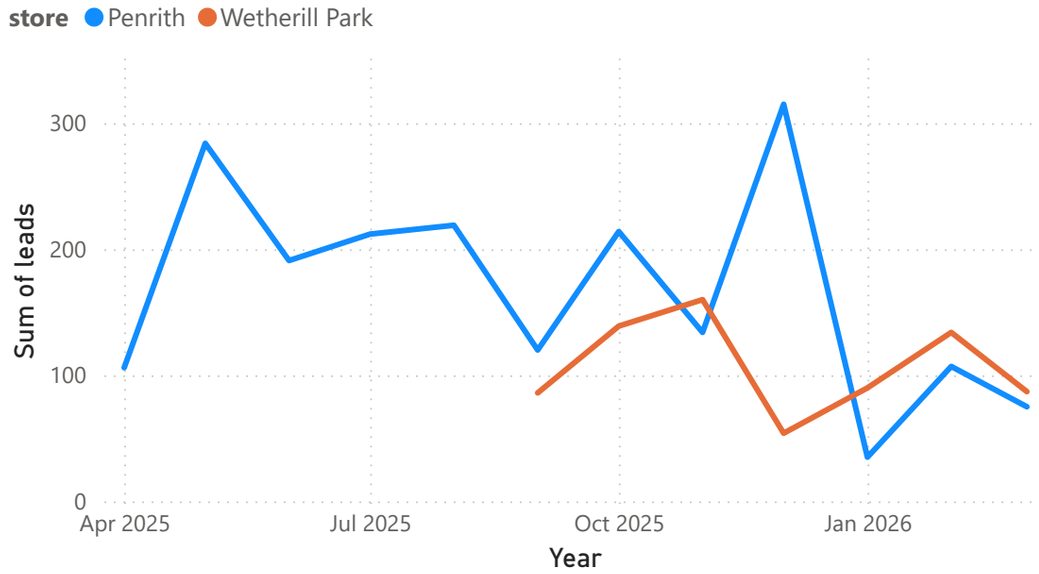
Avg CPL by campaign_name



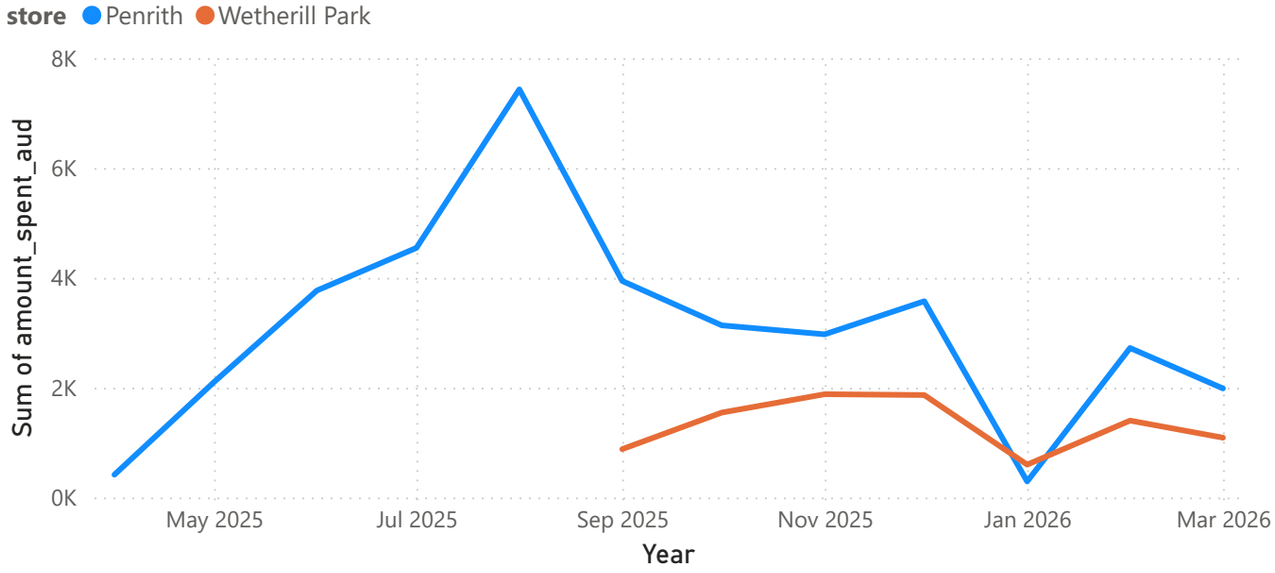
CPL Trend by Store



Monthly Leads by Store



Monthly Spend by Store



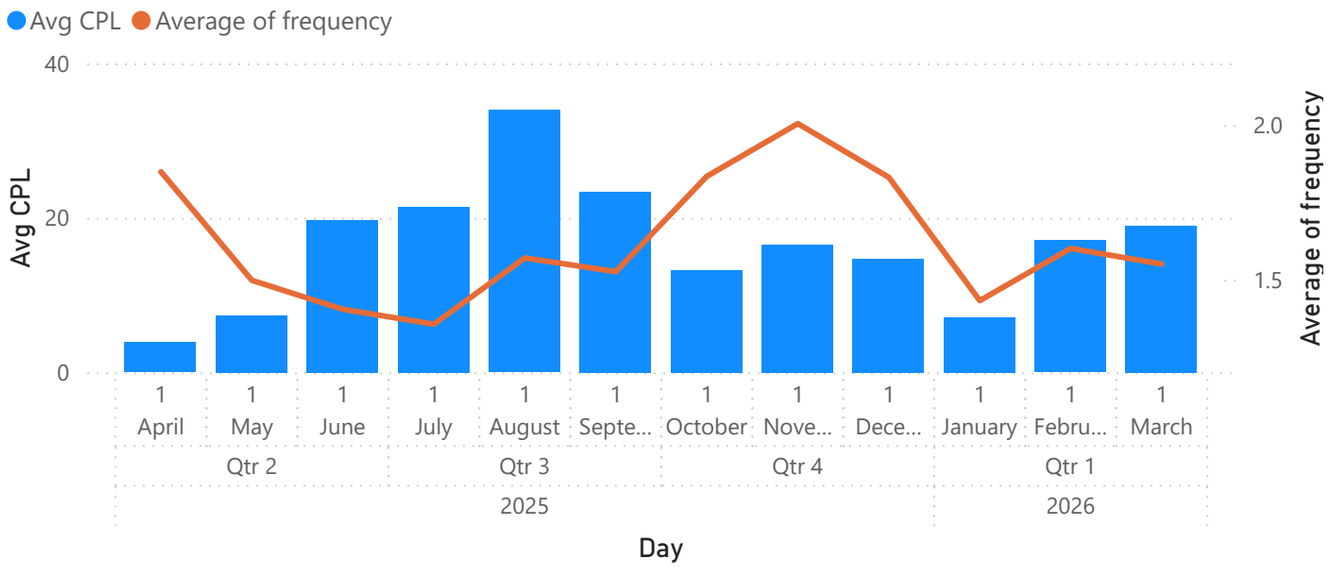
CPL Trend:

- Penrith CPL peaked at $34 in August 2025 during the Winter Offer campaign — the highest spend period of the year
- Wetherill Park launched in September 2025 and immediately achieved lower CPL than Penrith ($10 vs $20)
- Both stores spiked in December 2025 — Christmas campaign underperformed across the board
- Wetherill Park consistently runs at roughly half the CPL of Penrith

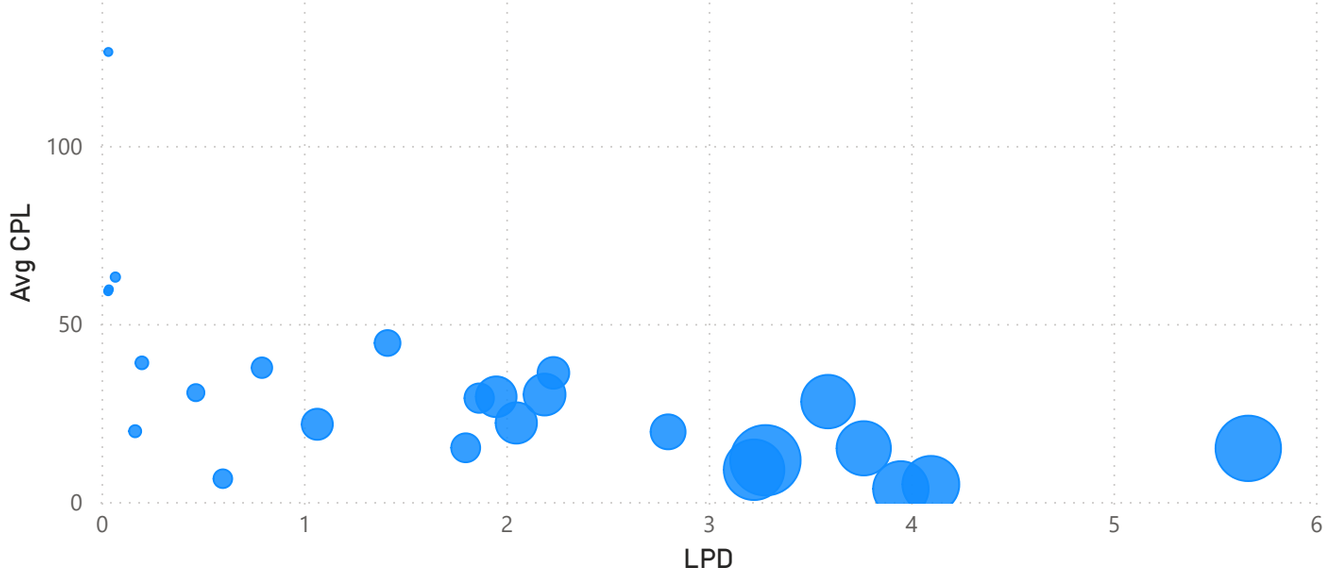
Spend vs Leads:

- Penrith's highest spend month (August, ~$7k) did not produce the highest lead volume — suggesting the Winter Offer was less efficient than earlier campaigns
- January 2026 saw the sharpest spend drop at both stores but CPL also hit its lowest point — low spend, high efficiency
- Wetherill Park generates comparable lead volume to Penrith at significantly lower spend

AVG CPL and Ad Frequency



LPD, Avg CPL and Sum of leads by campaign_name



Campaigns

- $29 SV Campaign
- $9 SV Campaign
- 1x MF Offer - Autumn 2026 - Penrith / Nepean
- 2026-01-2MFs199
- 2x MF Offer - Feb 2026
- 2x MF Offer - Feb 2026 - Penrith / Nepean
- 2x Multifocals for $199
- August Campaign

CPL vs Frequency combo chart:

- Frequency started high in April (~1.7) but CPL was very low (~$4) — proves that for a compelling offer like free glasses, high frequency doesn't hurt. People saw it multiple times and still converted.
- As campaigns shifted to multifocals from May onwards, frequency dropped but CPL climbed — the offer itself was harder to convert, not audience fatigue
- Frequency peaked at ~2.0 in September-October alongside elevated CPL (~$25-34) — this is the clearest fatigue signal in the data. The Winter Offer audience was getting saturated
- After October frequency dropped sharply and CPL followed — new campaigns refreshed the audience
- 2026 shows frequency stabilising around 1.6-1.7 with CPL moderate — healthy range

Best Performing Creatives:

- Price Static is a clear standout at ~4 leads per day — significantly ahead of everything else
- Price-focused creatives dominate the top of the chart — Price Static, In-store Creative, Price B Colour Change, Price Angle w/ Video all in the top 6
- DTC and 2xMfs199_Video_1_Price performing well suggests video price creatives are strong
- Fit & Style Static and Price v2 in-store creative are at the bottom — style angles consistently underperform price angles for this audience

The headline insight:

Price-focused creatives outperform style and convenience angles across the board. The City Optics audience responds primarily to value messaging — this should inform every future campaign creative decision.
